Re: Changes to Two AESO Energy Trading System Reports (Merit Order Snapshot – Energy and Merit Order Snapshot – DDS)

The AESO will soon complete changes to two Energy Trading System based reports, Merit Order Snapshot – Energy and Merit Order Snapshot – DDS (the "Reports"). The current versions of the Reports are based on snapshots of the Energy Market and Dispatch Down Service Merit Orders taken at the 30 minute point of each settlement interval. The changes will ensure that all restatements will be contained in the Reports and as such will reflect the final state of all Energy Market and DDS offers for each settlement interval.

These changes will take effect at 12:00 am on October 31, 2014. As the Reports display data that is 60 days old, data from September 1, 2014 onwards will use the new methodology whereas data on or before August 31, 2014 will use the old methodology. Please see the example below:
