Attention: Jamie Cameron, Application Officer

Dear Mr. Cameron:

Re: **AESO 2007 General Tariff Application (Application No. 1485517)  
Calculations for Graphs in AESO Argument**

On June 21, 2007, the Alberta Electric System Operator submitted written argument in its 2007 General Tariff Application proceeding. The AESO's argument included four graphs illustrating points being made in the text.

Earlier this week an intervener contacted the AESO requesting the data underlying one of the graphs. As the underlying data may be of interest to other parties in this proceeding, the AESO has submitted an Excel workbook containing the data and calculations for all of the graphs included in its written argument, via the EUB Digital Data Submission system.

If any party has questions on the graphs or workbook, please contact me at (403) 539-2465 or by e-mail to [john.martin@aeso.ca](mailto:john.martin@aeso.ca), or Heidi Kirrmaier at (403) 539-2751 or by e-mail to [heidi.kirrmaier@aeso.ca](mailto:heidi.kirrmaier@aeso.ca).

Yours truly,
