Dear Market Participants:

Re: AESO Reliability Committee (ARC) Work Group Meetings

At the December 17th meeting of the AESO Reliability Committee, ARC members concurred that work groups be established to review the FERC approved NERC reliability standards.

The draft work group [Terms of Reference](#) were provided to ARC members and comments have been requested by January 9th, 2008. We expect the work group terms of reference to be finalized at the next ARC meeting. The AESO is of the opinion that the first work group meetings of the Operations Work Groups and the Technical Work Group should proceed as soon as possible.

The first meeting for the ARC Operations Work Group has been scheduled for Tuesday, January 22 and the first meeting for the ARC Technical Work Group has been scheduled for Thursday, January 24, 2008.

Please refer to the attached document for a list of standards that will be reviewed, the meeting agenda and other meeting details.

Attendance in the work group meetings is open to any market participant who is affected by a standard being reviewed by that work group.

If you are planning on attending either of the meetings then we request you RSVP to allison.mathews@aeso.ca by January 15, 2008.

If you have any questions regarding the standards being reviewed, please contact Ken Gardner at 539- 2492 (ken.gardner@aeso.ca), or myself at 539-2496 (jerry.mossing@aeso.ca)

Yours truly,
