

AESO Reliability Standards Monthly Report

November/December 2009

VAR-001-WECC-1 - Voltage and Reactive Control

Purpose:

Draft 1 Standard, posted for comment.

Current Standard:

Applicable WECC entities must follow the NERC standard, VAR-001-1.

Proposed Standard:

The proposed standard will to ensure that voltage levels, reactive flows, and reactive resources are monitored, controlled, and maintained within limits in real time to protect equipment and the reliable operation of the Western Interconnection.

Applicability:

Generator Operators, Transmission Operators

Current Status:

The first draft of VAR-001-WECC-1 is posted for comment until January 29, 2010.
