

August 30, 2007

Dear Market Participants and Interested Parties:

Re: **AESO Recommendation Paper Congestion Management Plan**

In the letter regarding [Congestion Management and SOK-240 Operation](#), posted to the AESO website on August 9, we indicated that a comprehensive Congestion Management paper would be issued in late August. The paper, entitled [AESO Recommendation Paper – Congestion Management Plan](#), is now available on our website.

All market participants and interested parties are encouraged to provide comments to the AESO on the Congestion Management Plan by September 28, 2007. A formal stakeholder session will be announced shortly during which the new congestion management protocol will be reviewed. The AESO will subsequently follow the normal rules process to approve new congestion management rules and modify the appropriate operating policies and procedures to align with the protocol.

Please email your comments on the paper to Gordon.Nadeau@aeso.ca or Doug.Simpson@aeso.ca.

Should you have any questions regarding the Congestion Management Plan paper, please contact Gordon Nadeau at 539-2568 or Doug Simpson at 539-2494.

Yours sincerely,
