

AESO Reliability Standards Monthly Report

August 2009

COM-001-2, COM-002-3, IRO-001-2 & IRO-014-2 - Reliability Coordination

Purpose:

Draft 2 standards, posted for comment.

Current Standards:

Most of the requirements in this set of standards were translated from Operating Policies as part of the Version 0 process. There have been suggestions for improving these requirements, and the drafting team will consider comments submitted by stakeholders, drafting teams and FERC in determining what changes should be proposed to stakeholders.

Proposed Standards:

The proposed standards are meant to:

- ensure that the reliability related requirements applicable to the Reliability Coordinator are clear, measurable, unique, and enforceable,
- ensure that this set of requirements is sufficient to maintain reliability of the Bulk Electric System,
- revise the group of standards based on FERC Order 693.

Applicability:

Reliability Coordinator, Balancing Authority, Transmission Service Provider, Transmission Operator, Distribution Provider, Generator Operator, Purchasing Selling Entity and Load Serving Entity

Current Status:

The comment period ended August 9, 2009. The AESO submitted comments as a member of the Standards Review Committee (SRC) of the ISO/RTO Council. The comments can be seen using the link below.
