

September 29, 2006

Dear Stakeholders:

Re: Calgary Area Load Information Availability

On Oct 13, 2006 the AESO will no longer post the Calgary Area Load calculation on the Current Supply and Demand report.

The Calgary Area Load calculation was added on Oct 13, 2005 as it had been defined as an operating parameter in Operating Policies and Procedures (OPP) 304 and 510 to determine Calgary TMR requirement and export capability. In June 2006, the AESO implemented modified OPP 304 and 510 that do not use Calgary Area Load.

For further information, please contact myself at 539-2496 or Steve Heidt at 539-2493.

Yours truly,
