Message |  EPCOR comments re PRC-008-AB-1.doc (126 KB)

EPCOR's comments regarding the above are attached.

EPCOR comments re PRC-008-AB-1.doc

In addition to the comments in the matrix, EPCOR would like to inquire regarding the following statement in the letter of notice:

"Further, and with regard to certain requirements of the Proposed Reliability Standard, reference will be made in the Alberta Reliability Standards section of the AESO website to documents with related requirements in order to inform applicable entities of the existence of such requirements."

It is unclear how such "reference" will be made, or what validity or enforceability such references will have, or what is the purpose of including this statement in the letter of notice. There is no reference in the proposed Rule to any other existing or proposed Rules with "related requirements". Comments are accordingly difficult to provide. EPCOR would appreciate clarification regarding this matter.

Yours truly,

Kirk Poteet
