

March 5, 2007

Mr. R. D. Heggie  
Alberta Energy & Utilities Board  
640 – 5<sup>th</sup> Avenue S.W.  
Calgary, AB  
T2P 3G4

Dear Mr. Heggie:

Re: February 2007 update to the 10-Year Transmission System Plan

On December 21, 2006, the AESO filed with the EUB an update of the 10-Year Transmission System Plan ("the Plan") that it had originally filed with the EUB in late December 2004 pursuant to ss. 4(1)(a) and (d) of the *Transmission Regulation*.

Pursuant to s. 4 (1)(b) of the *Transmission Regulation*, the AESO has updated the Plan to address the foregoing. Pursuant to s. 4 (1) (d) of the foregoing regulation, we are hereby filing an update of the Plan, dated February 2007.

This latest filing has been updated to reflect several corrections that will be of assistance to stakeholders. The AESO has become aware that several maps, when converted to PDF format, were not as clear as anticipated and noted several typographical and other such corrections that should be addressed. As well, several summary tables, located in Section 6, were truncated when incorporated into the initial document.

The AESO requests that the Board, as a convenience to stakeholders, post this updated Plan and make it available on the IAR system as the updated Plan, in lieu of the December 21st version.

We are also forwarding 10 paper copies of the updated 10-Year Transmission System Plan for your convenience, under cover of this letter.

Thank you.
