

AESO Reliability Standards Monthly Report

Summer 2010

FAC-003-2 – Vegetation Management

Purpose:

Draft 4 Standard, posted for comment and ballot.

Current Standard:

FAC-003-1 was approved by the NERC Board of Trustees on February 7, 2006.

Proposed Standard:

The project is an update to FAC-003-1, which was approved in 2006. The items identified for revision include the incorporation of FERC Order 693 comments related to applicability, procedural repairs to conform to the current standards format and development procedure, technical updates and guidance to address stakeholder suggestions, and the elimination of "fill-in-the-blank" components.

Applicability:

Transmission Owners

Current Status:

The standard was posted for ballot and comment until July 19. The AESO cast a Negative ballot. The standard received 66% support from the ballot body and will proceed to a recirculation ballot.
