Dear Stakeholders:

**Re: Intertie Restoration Discussion Paper**

The AESO has released an Intertie [Restoration Discussion Paper](#). The AESO is seeking feedback on the paper by April 16<sup>th</sup>. A [comment matrix](#) is attached to facilitate feedback.

As part of this initiative, the AESO is forming two working groups: an import restoration group and an export restoration group. The import restoration group will be focused on developing the specific terms and conditions of the LSSi product, procedures for activation and a procurement process. The export group will initially be identifying options for competitive procurement of GRAS and system studies required to assess those options.

Comments on the revised recommendations should be sent to Kris Aksomitis [Kris.Aksomitis@aeso.ca](mailto:Kris.Aksomitis@aeso.ca). The deadline for comments on the paper is April 16<sup>th</sup>. Participants interested in participating in a working group should also register with Kris Aksomitis, also by April 16<sup>th</sup>. The first work group meetings will be held in late April.

Yours truly,

*“original signed by”*

Kris Aksomitis
