

Long-term Transmission Planning Stakeholder Meeting
Friday, November 16, 2007
9 a.m. to 11 a.m.

The Westin Calgary
320 4th Avenue SW
Mayfair Room

The AESO is pleased to invite all interested stakeholders to an initial consultation meeting to discuss development of the AESO's long-term transmission system plans.

The meeting will be held in Calgary on Friday November 16, 2007 from 9 a.m. to 11 a.m. in the Mayfair Room at the Westin Hotel, 320-4th Avenue S.W. Please RSVP to karissa.ohsberg@aeso.ca by Thursday, November 8.

At this first session we will present the AESO's Future Demand and Energy Outlook 2007-2027, which is a key input into our long-term plans for the transmission system. We will also be seeking stakeholder comment on draft generation scenarios that have been developed for the purpose of creating long-term transmission system plans for the 10 and 20 year timeframe. In keeping with the AESO's consultation principles, stakeholder questions at the session as well as subsequent comments will be documented and responses provided in a formal matrix that will be posted to the AESO's website a few weeks following the meeting. Please see the meeting agenda below.

Thank you

Jeff Nish, P.Eng.
Director, Resource Adequacy
Transmission
