

June 30, 2010

Dear Operating Reserve Market Participants:

At the May 26, 2010 Market Services stakeholder information session, the AESO announced that as part of phase one of the operating reserve market redesign, changes would be made to the Daily OTC Transactions report.

As a result, effective Tuesday July 6, 2010, an updated Daily OTC Transactions report will be available on the ETS section of the AESO website. Participants will be able to access the report via the historical reports section of the ETS section of the website.

The updated OTC Transactions report will provide users with both the weighted average premium/discount of accepted offers as well as the average volume procured for each product by on-peak and off-peak.

Each morning at 7:30AM the OTC Transactions report will update with OTC data from the previous trading day.

If you have any questions regarding the Daily OTC Transactions report please contact me at ph: 403-539-2810.

Yours truly,

Daniel Clark
Commercial Analyst
