Dear Market Participant:

Re: AESO Reliability Committee

On July 13th, the AESO notified market participants that the AESO is establishing an AESO Reliability Committee (ARC) which will serve as a forum for owners, operators and users of the transmission system to provide advice to the AESO respecting: standards, criteria, procedures, rules and processes respecting maintenance, security and reliability matters; and compliance/performance monitoring processes, dispute resolution, violation/penalty enforcement, and appeals processes. The AESO requested stakeholder feedback by August 31, 2007. In this regard, the AESO has posted on the AESO website a [Summary of Comments](#) received and a response from the AESO.

At this time we have finalized the [Terms of Reference](#) for the Committee and a method for determining representation on the Committee and these details are also posted on our website in the same location as noted above. We encourage you to consider forwarding a nomination for representation in the identified sectors as outlined in the Terms of Reference, by November 2nd, 2007.

Please contact the writer if you have questions or comments.

Yours truly,
