Re: Testing on 840 McNeill Converter Tests (Alberta – Saskatchewan Intertie)

On Thursday, January 26, ATCO Electric will perform testing at the McNeill converter station that will affect the import and export limits of the Alberta - Saskatchewan intertie.

There will be two test periods:

1. 12:00 – 12:30 p.m. requiring an import (Saskatchewan to Alberta) of 50 MW
2. 12:30 – 13:00 p.m. requiring an export (Alberta to Saskatchewan) of 50 MW.

During both test periods, the Alberta – Saskatchewan intertie Available Transfer Capability (ATC) will be posted as zero for both import and export.

Should you have any questions, please contact Cameron Bush, Manager - Operations Coordination, at ph: 403-705-5204.

Sincerely,
