Re: Upgrade notification to participants for the Energy Trading System (ETS)

As part of the AESO's planned maintenance and system enhancements, there was an ETS upgrade completed on Thursday, Oct 23<sup>rd</sup>, at 2:15PM MST. This upgrade was part of our ongoing program to enhance our systems to ensure the highest possible level of service to customers.

Participants now have the ability to perform the following new functions in ETS:

- Energy Restatement (source) via File Upload
- DDS Restatement via File Upload

If you have any comments or questions related to this new feature, please send an email to [info@aeso.ca](mailto:info@aeso.ca).

Sincerely,
