

AESO Reliability Standards Monthly Report

July 2009

New Standard – Real-Time Tools

Purpose:

Draft SAR, Version 1, posted for comment.

Current Standards:

This will be a new standard.

Proposed Standard:

The SAR proposes developing requirements for the functionality, performance, and management of real-time tools for reliability coordinators, transmission operators, and balancing authorities for use by their system operators in support of reliable system operations, with a focus on alarming, telemetry, and network analysis.

Applicability:

Reliability Coordinator, Balancing Authority, Transmission Operator, Generation Operator

Current Status:

Posted for comment until July 11, 2009. The AESO submitted comments, which can be seen using the link below.
