

# AESO Reliability Standards Monthly Report

June 2009

## WECC Bulk Electric System Definition

### **Purpose:**

The Bulk Electric System (BES) Definition Task Force (BESDTF) has posted the first draft of their BES proposal for comment.

### **Current Standard:**

Although this is not a Standard, the BESDTF has agreed to follow the process for developing and approving WECC Standards. The WECC does not currently have a definition for the BES and relies on the NERC definition.

### **Proposed Standard:**

The purpose of the BESDTF is to provide clarity as to which power system elements are deemed to be part of the BES. The BESDTF presents 2 options and 2 voltage classifications to define the BES.

### **Applicability:**

All WECC entities.

### **Current Status:**

A questionnaire on the BES definition was posted for comment until June 29. The AESO submitted comments, which can be seen at the link below.
