

AESO Reliability Standards Monthly Report

March 2009

IRO-006-4, MOD-021-0, PER-001-0, TPL-006-0 – Errata

Purpose:

Errata, posted for comment.

Current Standard:

The four standards have minor omissions or errors which are being corrected. The corrections have no impact on the intent of the standard.

Proposed Standard:

- IRO-006-4 – corrected hyperlink to WECC site.
- MOD-021-0 – added missing comma in R1.
- PER-001-0 - The term "position description" in M1.1. has been changed to "job description".
- TPL-006-0 - The only measure in the standard was called M2. It has been changed to M1.

Applicability:

No entity is affected by the corrections made to these standards.

Current Status:

The errata are posted for comment until March 2, 2009. NERC is currently reviewing the comments. The AESO responded to the comment request as a member of the ISO/RTO Standards Review Committee (SRC). The SRC simply agreed that the changes met the errata definition.
