

AESO Reliability Standards Monthly Report

May 2009

TOP-001 to 004 – Real-Time Operations

Purpose:

Draft 2 of Revised Standards.

Current Standards:

The current standards are TOP-001-1, TOP-002-2, TOP-003-0, TOP-004-1, TOP-005-2, TOP-006-1, TOP-007-0, TOP-008-1 and PER-001-0.

Proposed Standards:

The plan is to consolidate the standards into TOP-001-2, TOP-002-3, TOP-003-1 and TOP-004-2. TOP-005-2, TOP-006-1, TOP-007-0, TOP-008-1 and PER-001-0 will be retired.

The new standards will eliminate redundancy in the Transmission Operations (TOP) family of standards. As part of this process, the drafting team has made an effort to reorganize the standards and requirements in a more logical manner.

Applicability:

Transmission Operator, Transmission Owner, Balancing Authority, Generator Owner, Generator Operator, Interchange Authority, Load-Serving Entity, Distribution Provider

Current Status:

The proposed standards were posted for comment until May 7, 2009. The AESO commented as a member of the ISO/RTO Standards Review Committee (SRC). The comments can be seen using the link below.
