RE: System Marginal Price and Pool Price for HE 01 on March 1st, 2009

The AESO intentionally delayed the posting of the Pool Price (PP) for HE01 on March 1st, 2009, due to a suspected error in the calculation of the System Marginal Price (SMP). However, upon an immediate investigation, the AESO determined that there was not an error, and the PP was updated accordingly at approximately 1:58AM MST.

This was communicated to participants in real-time through the AIES Event Log.

Sincerely,
