

## **AESO Consolidated Long-term Plan Invitation to Sept. 3 stakeholder meeting**

The AESO is pleased to invite all interested stakeholders to an information session and consultation regarding the AESO's long-term transmission system plans; the 20-year Outlook and 10-year Transmission System Plan.

The meeting will be held in Calgary on Wednesday, September 3, 2008 from 9 a.m. to 11 a.m. in the Mayfair Room at the Westin Hotel, 320-4th Avenue S.W.

At this session the AESO will provide a summary of the high-level bulk transmission system concepts presented at the June 9 stakeholder meeting to set the context for discussion about proposed regional transmission concepts for system reinforcement over the next 10-year period. The AESO is seeking stakeholder comment and input on these proposed concepts.

In keeping with the AESO's consultation principles, stakeholder questions at the session as well as comments submitted by stakeholders during a comment period after the session will be documented and included in a stakeholder comment and response matrix. All comments included in this matrix will be attributed to each stakeholder's corporate/organizational affiliation rather than to the names of individuals participating in this session. The matrix will be made public by posting to the AESO's website as part of the consultation for the development of the AESO's long-term plans for the Alberta Interconnected Electric System.

We look forward to your feedback on our plans. Please RSVP to [karissa.ohsberg@aeso.ca](mailto:karissa.ohsberg@aeso.ca) before Wednesday, August 27.

Regards,

Jeff Nish, P. Eng.  
Director, Resource Adequacy  
Transmission
