**Re: Notification to Participants: Errors on Supply Adequacy Report for current and historical hours**

The AESO is currently experiencing technical difficulties with the reporting of the information within the Supply Adequacy Report available at [www.aeso.ca](http://www.aeso.ca), Market and System Reporting > Supply Adequacy for current and historical hours.

**Please note, the information for future hours is reporting as intended.**

We are working to resolve this reporting issue for current and historical hours as soon as possible, and will continue to provide updates to participants as the status changes.

We would like to thank participants for their cooperation during this time.
