

# AESO Reliability Standards Monthly Report

May 2010

## **TPL-001-1 – System Performance Under Normal Conditions**

## **TPL-002-1b - System Performance Following Loss of a Single BES Element**

## **TPL-003-1a - System Performance Following Loss of Two or More BES Elements**

## **TPL-004-1 - System Performance Following Extreme BES Events**

### **Purpose:**

Standard Authorization Request posted for comment and Pre-Ballot Review.

### **Current Standards:**

The Version 0 standards were adopted by NERC Board of Trustees: October 29, 2008 and became effective May 13, 2009.

### **Proposed Standards:**

The SAR is to address FERC Order RM06-16-009 which required the ERO to clarify TPL-002-0, Table 1 — footnote 'b', regarding the planned or controlled interruption of electric supply where a single contingency occurs on a transmission system by June 30, 2010. The SAR provides a revision to TPL Table 1 footnote 'b' to provide clarity to industry with regard to the planned or controlled interruption of electric supply where a single contingency occurs on a transmission system. The referenced table appears in TPL-001, TPL-002, TPL-003, and TPL-004 so while the FERC Order was for TPL-002, the change is reflected in all 4 standards.

### **Applicability:**

Planning Authority, Transmission Planner

### **Current Status:**

The SAR is posted for comment until May 26 and pre-ballot review until May 17.
