Re: **10 Minute Historical Data for Total Wind Power and Alberta Internal Load**

In April 2010 the AESO [published](#) six years of historical 10 minute wind power and Alberta Internal Load (AIL) data. In response to continued interest in this information the AESO is providing a similar dataset for 2010. The one key difference between the data provided for the period between 2004 and 2009 and the 2010 data is that the latter dataset does not include a data quality flag.

Please [click here](#) to view the data file.

The AESO has been requested to provide this data on a regular schedule and currently proposes that quarterly updates be provided, with the first quarter (January 2011 through March 2011) being made available in early April.

If you have any questions or comments please contact Matthew Davis at (403)-539-2645 or matthew.davis@aeso.ca.

Yours truly,
