

# AESO Reliability Standards Monthly Report

May 2010

## **VAR-001-WECC-1 - Voltage and Reactive Control**

### **Purpose:**

Draft 2 Standard, posted for comment.

### **Current Standard:**

Applicable WECC entities must follow the NERC standard, VAR-001-1.

### **Proposed Standard:**

The proposed standard will to ensure that voltage levels, reactive flows, and reactive resources are monitored, controlled, and maintained within limits in real time to protect equipment and the reliable operation of the Western Interconnection.

### **Applicability:**

Generator Operators, Transmission Operators

### **Current Status:**

The second draft of VAR-001-WECC-1 is posted for comment until June 7.
