

AESO Reliability Standards Monthly Report

August 2009

WECC-0055 - Remedial Action Scheme

Purpose:

WECC Standards/Regional Criteria Request

Current Practice:

This new criteria is meant to more efficiently comply with NERC Reliability Standards, specifically PRC-012-0 – Special Protection System Review Procedure, PRC-013-1 – Special Protection System Database, and PRC-014-0 – Special Protection System Assessment

Proposed Criterion:

This is a request to develop a criterion to comply with the requirements of the NERC PRC standards. In addition, the criterion drafting team will be asked to classify remedial action schemes that have significant impact on the interconnected system, especially distinguishing significant schemes from those that have only a local impact, in order to more efficiently expedite Special Protection System (SPS) review, database management, and operation assessments. This criterion will assist WECC in focusing review and tracking efforts on the schemes which are important to operation of the interconnected system.

Applicability:

Reliability Authority, Balancing Authority, Transmission Operator, Distribution Provider, Generator

Current Status:

Posted for a 2 week comment period ending on September 02, 2009.
