

# AESO Reliability Standards Monthly Report

August 2009

## WECC-0059 - Relay Misoperation Procedure

**Purpose:**

WECC Standards/Regional Criteria Request

**Current Practice:**

NERC Reliability Standard PRC-003-1 Requirement R1 requires that each Regional Reliability Organization establish, document and maintain its procedures for review, analysis, reporting and mitigation of transmission and generation protection system misoperations. There are currently three separate WECC documents that address this requirement (PRC-STD-003-1, MORC – Section 2.A.4, and WECC Reporting Requirements for System Events).

**Proposed Criterion:**

The WECC regional criterion will document the WECC procedure for the analysis of misoperations of transmission and generation protection is being submitted. The draft document titled WECC Procedure for Analysis of Misoperations of Transmission and Generation Protection is also being submitted as the proposed starting point for this effort.

**Applicability:**

Transmission Owner, Distribution Provider, Generator

**Current Status:**

Posted for a 2 week comment period ending on September 02, 2009.
