WECC-0070 Governor Droop Setting Criterion

Purpose:

Draft 1 Criterion, posted for comment.

Current Criterion:

There is a new criterion.

Proposed Criterion:

The objective is to develop a regional criterion as a replacement to current MORC Section 1.C.2. The ORCWG recommends that a criterion be developed to address governor droop settings. The drafting team should develop a governor droop criteria that contain a range for droop settings and/or if appropriate an area (system) droop performance requirement.

Applicability:

Generator Owners

Current Status:

A questionnaire for comments is posted until November 15.
