

AESO Reliability Standards Monthly Report

September 2010

WECC-0074 MOD-(11 and 13)-WECC-CRT-1– Power Flow Base Case and Dynamic Stability Data Preparation Procedure

Purpose:

Standards/Regional Criteria Request Form posted for comment.

Current Criterion:

This is a new Criterion.

Proposed Criterion:

The criterion is being written to establish the data collection procedure whereby data is collected to create an accurate modeling of generation, transmission, and load in WECC base cases.

This Regional Criterion is being developed pursuant to NERC Reliability Standards MOD-011-0 — Regional Steady-State Data Requirements and Reporting Procedures and MOD-013-1 — RRO Dynamics Data Requirements and Reporting Procedures.

Applicability:

Generator Owner, Reliability Assurer (WECC), Transmission Owner, Transmission Planners

Current Status:

The WECC Standards/Regional Criteria Request Form (Request) WECC-0074, Power Flow Case and Dynamic Stability, requesting development of a new Regional Criterion identifying Steady State and Dynamics data reporting procedures was posted for comment until September 07. The AESO did not submit comments.
