Dear Market Participants and Interested Parties

Re: Amendment - Test Run Of The Rossdale Generators

Further to our letter dated September 12, 2006, announcing AESO's order for Epcor to conduct a test run of the Rossdale generators during the period October 23 -25, 2006, there was an error with the posted dates for testing. Please note that the test run will be conducted during the period November 20 -22, 2006 and not the dates previously posted.

Yours truly,
