Listed below is the summary description of changes for the proposed new COM-002-AB-4. Please refer back to the Consultation Letter under the “Attachments” section to view materials related to the proposed new COM-002-AB-4. Please place your comments/reasons for position underneath (if any).

Alberta Reliability Standard	Stakeholder Comments and/or Alternative Proposal
<p>New</p> <p>The AESO is seeking comments from stakeholders with regard to the following matters:</p> <ol style="list-style-type: none"> 1. Are there any requirements contained in proposed new COM-002-AB-4 that are not clearly articulated? If yes, please indicate the specific section of proposed new COM-002-AB-4, describe the concern and suggest alternative language. 2. Please provide any additional comments regarding proposed new COM-002-AB-4. 	<p><i>Comment # 1: For R1.6, how is the “nomenclature for system elements” defined/established? Also, AltaLink noticed that the AESO uses “system elements” rather than “Transmission interface Elements and Transmission interface Facilities” that is used in NERC’s COM-002-4. Could the AESO provide some explanation on the change? Does “system element” here have the same meaning as defined in the Consolidated Authoritative Document Glossary?</i></p> <p><i>Comment # 2: For R4.1, should the assessment be based on all members of the operating personnel, or could it be based on sampled members of the operating personnel? Will the AESO develop an Information Document for assessing the adherence to the communication protocol?</i></p> <p><i>Comment # 3: For R4.2, should the assessment be based on all members of the operating personnel, or could it be based on sampled members of the operating personnel? Will the AESO develop an Information Document for assessing the effectiveness of the communication protocol?</i></p>
