Alberta Reliability Standard	Market Participant Comments and/or Alternative Proposal
New The AESO is seeking comments from market participants with regard to the following matters: 1. Are there any requirements contained in proposed new FAC-008-AB-3 that are not clearly articulated? If yes, please indicate the specific section of proposed new FAC-008-AB-3, describe the concern and suggest alternative language. 2. Please provide any additional comments regarding proposed new FAC-008-AB-3.	<i>Comment # 1: A request to add further clarification on the applicability of an industrial complex within the standard. This will eliminate confusion of applicability for industrial complexes that export electricity.</i> <i>For example, in the new CIP standards there is a subsection that provides industrial complex applicability. Eg. CIP-003-AB-5 – 4. Applicability 4.2.2.3.3. “within an industrial complex with supply transmission service greater than 67.5 MW”.</i> <i>Perhaps the CIP wording can be adopted within the FAC-008-AB-3.</i>
