

Heartland Generating Station Interconnection Stakeholder Update – Project Cancellation

June 2019

Project Cancellation

The purpose of this update is to inform stakeholders that the ATCO Power (ATCO) request for system access service to connect its approved Heartland Generating Station (Facility) in the City of Fort Saskatchewan area has been cancelled.

The Alberta Utilities Commission originally approved the Alberta Electric System Operator's (AESO) *ATCO Power Heartland Generating Station Connection Needs Identification Document* (NID) on February 7, 2018. The NID approval included the following transmission developments:

- Adding one 240 kV transmission line to connect ATCO's proposed Facility to the transmission system.
- Modifications to the existing Josephburg 410S substation, including adding one 240 kV circuit breaker.

On May 6, 2019 the AESO received correspondence from ATCO to cancel its request for system access service. In response, on May 24, 2019, the AESO cancelled ATCO's request for system access service.

The AESO's project-related information is available on the AESO's website at <https://www.aeso.ca/grid/projects/heartland-generating-station-interconnection/>

Who is the AESO?

The AESO plans and operates Alberta's electricity grid and wholesale electricity market safely, reliably and in the public interest of all Albertans. We are a not-for-profit organization with no financial interest or investment of any kind in the power industry.

We appreciate your views. If you have any questions or comments, please contact us directly.

For Further Information

Please contact the AESO through stakeholder.relations@aeso.ca or call our stakeholder relations toll-free line at 1-888-866-2959 if you have any questions.
