

Need for the Wheatland Wind Project Connection in the Dorothy area

FAST FACT

Alberta's electric transmission system comprises the towers, wires and related equipment that are a part of moving electricity from where it is generated to where it is used.

Wheatland Wind Project Ltd. (Wheatland) has applied to the Alberta Electric System Operator (AESO) for transmission system access to connect its proposed Wheatland Wind Project (Facility) in the Dorothy area. Wheatland's request can be met by the following solution:

> PROPOSED SOLUTION

- Add a substation (Parker 2072S) with three 144 kilovolt (kV) circuit breakers.
- Add two 144 kV transmission lines to connect the proposed Parker 2072S substation to the existing 144 kV transmission line 7L85.
- Add a 144 kV transmission line to connect the Facility to the proposed Parker 2072S substation.
- Add or modify associated equipment as required for the above transmission developments.

> NEXT STEPS

- In late 2017, the AESO intends to submit a needs identification document (NID) to the Alberta Utilities Commission (AUC) for approval.
- Once submitted, the NID will be posted on the AESO's website at www.aeso.ca/grid/projects/

The following organizations have key roles and responsibilities in providing access to the transmission system:

> THE AESO:

- Must plan the transmission system and enable access to it for generators and other qualified customers.
- Is regulated by the AUC and must apply to the AUC for approval of its NID.

> ATCO ELECTRIC LTD.:

- Is the transmission facility owner in the Dorothy area
- Is responsible for detailed siting and routing, constructing, operating and maintaining the associated transmission facilities
- Is regulated by the AUC and must apply to the AUC for approval of its transmission facilities applications

> CONTACT US

We appreciate your views, both on the need for transmission system development and proposed transmission plans. If you have any questions or comments, please contact us directly.
