Kenneth Wyllie
Lead Application Officer
Alberta Utilities Commission
1400, 600 Third Avenue S.W.
Calgary, Alberta T2P 0G5

Dear Mr. Wyllie:

**Re: Alberta Electric System Operator ("AESO")
New Alberta Reliability Standard MOD-031-AB-2 ("new MOD 031-AB-2"), and Removal of Alberta
Reliability Standards MOD-016-AB-1.1, MOD-017-AB-0.1, MOD-018-AB-0 and MOD-019-AB-0
Proceeding 23521
Application 23521-A001**

Correction of typographical errors with approved new MOD 031-AB-2

On April 26, 2018 the Alberta Electric System Operator ("AESO") filed a Forwarding Notice for the proposed new MOD 031-AB-2 and retirement of existing MOD Standards. On May 24, 2018, the Alberta Utilities Commission ("Commission") issued Decision 23521-D01-2018, approving the AESO's application.

Subsequently, on May 27, 2018, the AESO identified two typographical errors with the new MOD 031-AB-2 that was approved by the Commission. In particular, the AESO determined that the new MOD-031-AB-2 contained one "R2 Intentionally left blank" requirement that should have read "R4 Intentionally left blank", and another "R2 Intentionally left blank" requirement that should have been deleted.

The AESO has corrected these errors and is now re-filing the [new MOD 031-AB-2](#), together with an accompanying [blackline](#).

Please contact the undersigned with any questions.

Sincerely,

"Melissa Mitchell-Moisson"
