

# ISO Rules

## Part 200 Markets

### Division 201 General

#### Section 201.4 Energy Market Submission Methods and Coordination of Submissions

#### External Consultation Draft August 31, 2018

#### Applicability

- 1 Section 201.4 applies to:
  - (a) a **pool participant**; and
  - (b) the **ISO**.

#### Requirements

##### Submission Method

**2(1)** Unless otherwise set out in the **ISO rules**, a **pool participant** must, in the manner the ISO specifies, submit any information required under sections 201 through 206 of the **ISO rules**, including **offers, bids**, operating constraints, **net settlement instructions**, **acceptable operational reasons** and reasons for restatements, through the Energy Trading System ~~in accordance with the manner set out in subsection 3 and in the Pool Participant Manuals published on the AESO website.~~

**(2)** The **ISO** must make submission procedures available and give reasonable notice regarding any ~~new, or modifications~~**changes** to the Energy Trading System.

##### Unable to Submit through the Energy Trading System~~Alternative Submission Method~~

**3(1)** ~~Notwithstanding subsection 2(1),~~ if a **pool participant** is unable to submit information through the Energy Trading System because the **pool participant's** computer systems are unavailable, then the **pool participant** must submit mandatory restatements to the **ISO** by telephone.

**(2)** If a **pool participant** submits information by telephone in accordance with subsection 3(1), the following conditions apply:

- (a) the **ISO** will not enter the information into the Energy Trading System on behalf of the **pool participant**; and
- (b) the **pool participant** must resubmit all restatements for current and future **settlement intervals** submitted under subsection 3(1) as soon as it is possible to do so.

**(3)** The **ISO** must:

- ~~(a)~~ not use information received by telephone to determine the energy market **merit order**; but
- ~~(b)~~ use such information to satisfy the requirements that a **pool participant** advise the **ISO** as soon as practicable that a **dispatch** or **directive** will not be complied with and to provide operational information to the **ISO**.

##### Extension of Time

**4(1)** The **ISO** may extend the time set for submitting an **offer** or **bid** if there is a system-wide unavailability of the Energy Trading System and the **ISO** determines the length of the unavailability warrants such extension.

# ISO Rules

## Part 200 Markets

### Division 201 General

## Section 201.4 Energy Market Submission Methods and Coordination of Submissions

(2) The **ISO** may not extend the time for submitting **offers** or **bids** longer than ~~one (1)~~ **settlement interval** following the **settlement interval** the Energy Trading System is back in service.

(3) The **ISO** must notify **pool participants** of any extension of time and its duration.

### Coordination of Submissions

5 A **pool participant** must coordinate its submissions in a manner that ensures the **pool participant** is able to comply with all **dispatches** related to those submissions

### Revision History

<b>EffectiveDate</b>	<b>Description</b>
<del>xxxx-xx-xx</del>	<del>Revised title of ISO rule and other administrative changes</del>
2014-07-02	Replaced the word “outage” with “unavailability” in subsection 4(1).
