Re: **Update on AESO Consultation for Development of Proposed Amended Section 502.2 of the ISO rules, *Bulk Transmission Line Technical Requirements* ("Section 502.2")**

On July 9, 2019, the Alberta Electric System Operator ("AESO") issued a [Letter of Notice for Development of a Proposed Amended Section 502.2 of the ISO rules, *Bulk Transmission Line Technical Requirements*](#) ("Letter of Notice") and sought feedback from Stakeholders regarding the development of amendments to Section 502.2. On July 29, 2019, the [Stakeholder Comments on Letter of Notice for Development](#) was posted with the written comments received from Stakeholders.

In the Letter of Notice, the AESO had proposed hosting a Stakeholder consultation session in early 2020 to discuss proposed amendments to Section 502.2. With respect to this previously proposed consultation session, the AESO no longer plans to host a Stakeholder consultation session in early 2020. The AESO is currently re-evaluating next steps related to the proposed amendments to Section 502.2 and will inform Stakeholders once a decision has been made.

Sincerely,

Melissa Mitchell-Moisson
