

# Renewable Electricity Program (REP) Round 1 Update

Four wind projects were selected for Round 1 of the Renewable Electricity Program (REP).

The generators for the following three REP Round 1 projects have successfully achieved Commercial Operation:

Proponent	Project	Contract Capacity (MW)	Nearest City/Town
Capital Power Corporation	Whitla Wind	201.6	Medicine Hat
Enel Green Power Canada, Inc.	Riverview Wind Farm	105.0	Pincher Creek
Enel Green Power Canada, Inc.	Phase 2 of Castle Rock Ridge Wind Power Plant	29.4	Pincher Creek

The fourth wind project, Sharp Hills Wind Farm, will not achieve Commencement of Construction by the Commencement of Construction Longstop Date in accordance with the terms of the Renewable Electricity Support Agreement (RESA). As a result, EDP Renewables SH Project Limited Partnership requested early termination of the RESA and payment equal to the Completion and Performance Security as set out in the RESA has been paid to the AESO.
