

Cancellation of the Luna Solar+ Phase One Project Connection

The Northland Power Luna 1 GP (Northland Power) request for transmission system access to connect its approved Luna Solar+ Phase One (Facility) in the Brooks area has been cancelled.

BACKGROUND

In November 2024, Northland Power and AltaLink began distributing an information package that included the AESO's Need Overview, Need for the Luna Solar Project Connection. The AESO Need Overview included the following transmission developments:

- Add one 240 kilovolt (kV) transmission line to connect the Facility to the existing 240 kV transmission line 935L in a T-tap configuration.
- Add one 240 kV transmission line to connect the Facility to the existing 240 kV transmission line 923L in a T-tap configuration.
- Add or modify associated equipment as required for the above transmission developments.

NEXT STEPS

The above developments are no longer needed; therefore, the AESO has withdrawn its NID application.

Information related to the Luna Solar Project Connection is available on the AESO's website at <https://www.aeso.ca/grid/transmission-projects/>

WHO IS THE AESO?

The Alberta Electric System Operator (AESO) plans and operates Alberta's electricity grid and wholesale electricity market safely, reliably and in the public interest of all Albertans. We are a not-for-profit organization with no financial interest or investment of any kind in the power industry.

We appreciate your views, both on the need for transmission system development and proposed transmission plans. If you have any questions or comments, please contact us directly.
