

# Cancellation of the Fox Meadows Wind Project Connection

*The ABO Energy Canada Ltd. (ABO Energy) request for transmission system access to connect its approved Fox Meadows Wind Project (Facility) in the Edgerton area has been cancelled.*

## BACKGROUND

The AESO originally applied to the Alberta Utilities Commission (Commission) for approval of the Fox Meadows Wind Project Connection Needs Identification Document (NID) on August 20, 2025. The NID application included the following transmission developments:

- Add a substation, designated as Spalding 1059S including two 138 kilovolt (kV) circuit breakers.
- Connect the proposed Spalding 1059S substation to the existing 138 kV transmission line 749AL using an in-and-out configuration.
- Connect the Facility to the Spalding 1059S substation.
- Add or modify associated equipment as required for the above transmission developments.

## NEXT STEPS

The above developments are no longer needed; therefore, the AESO has withdrawn its NID application.

Information related to the Fox Meadows Wind project is available on the AESO's website at <https://www.aeso.ca/grid/transmission-projects/>

## WHO IS THE AESO?

The Alberta Electric System Operator (AESO) plans and operates Alberta's electricity grid and wholesale electricity market safely, reliably and in the public interest of all Albertans. We are a not-for-profit organization with no financial interest or investment of any kind in the power industry.

We appreciate your views, both on the need for transmission system development and proposed transmission plans. If you have any questions or comments, please contact us directly.
