Dear Alberta Loss Factor Stakeholders – Holders of Generation and PPAs

Re: Updated Transmission Loss Factor Generic Stacking Order (“GSO”) Data Confirmation for 2016

The AESO posted the 2016 Generic Stacking Order (GSO) draft for stakeholder’s confirmation on August 11, 2015. In the confirmation process, stakeholders provided feedback and comments on the GSO values.

The AESO has reviewed the feedback and comments and this has resulted in updated GSO values. Please refer to [Updated 2016 Generic Stacking Order Draft Version](#) prepared by Teshmont regarding the Transmission Loss Factor GSO Data Confirmation for 2016. For your convenience, this report has highlighted the GSO values that have changed.

The AESO requests that stakeholders confirm the reposted GSO draft by October 27, 2015 (10 business days). The AESO appreciates the timely feedback from stakeholders which will improve the accuracy of 2016 GSO.

Yours truly,
