

AESO AIES 2017 Transmission Bus Loss Factors

2017 Non-Binding Loss Factors - Scenario B: With Wabamun area coal generation reduced by 500MW

1	The loss factor values listed are determined at buses with base voltage of 138kV or above, and are illustrative only
2	The loss factor calculation does not include an assessment for voltage or congestion criteria
3	For accuracy, a full study for each proposed generator would be required and the loss factor calculated accordingly
4	Please refer to the AESO facility map for Area definitions
5	Bus kV of a fictitious bus is assigned as the highest Bus kV of the buses they represent for convenience of presentation
6	BC and SK intetie loss factors are not included as they have been presented in the original 2017 5th year loss factor posting
