Re: **Approved Outages Reports for Years 2010 to 2016**

In response to a data request, the AESO is providing the historical Approved Outages Reports from January 2010 to June 2016. As the volume of data is too large to be posted on our website, anyone interested in obtaining this data can request it from info@aeso.ca.

The current Approved Outages Report can be found on the AESO website at www.aeso.ca by following the path Grid Operations > Outages > Approved.

Yours truly,
