Re: Update to Import and Export Metered Volumes Data

The AESO is providing additional hourly import and export metered volumes for the B.C., MATL and Saskatchewan interties. The information provided represents the volumes scheduled on each intertie, deemed to be the metered volumes. The metered volumes for each import and export unit on each tie were summed to arrive at the hourly aggregate value. Individual metered volumes are available in the metered volumes (all) report. The AESO intends on providing updates to this data set on a quarterly basis.

Please [click here](#) to view the report, which contains the import and export MWh values for the British Columbia, Montana and Saskatchewan interties from April 1, 2014 through December 31, 2014.

The data file was uploaded again due to an error.
