Dear Alberta Loss Factor Stakeholders – Holders of Generation and PPAs

Re: **Updated Transmission Loss Factor Generator and Import Data Confirmation for 2014**

The AESO posted the 2014 Generic Stacking Order (GSO) draft for stakeholder's confirmation on August 20, 2013. In the confirmation process, Milner Power Inc. and ENMAX Energy Corporation reported the differences between their calculation and the posted GSO draft.

The AESO has reviewed its calculation and found an error in the AESO's calculation spreadsheet. The spreadsheet incorrectly linked to a 2014 data file instead of a 2013 data file. The AESO has revised its calculation and reposted the GSO draft.

The GSO draft posted on September 3, 2013 is a full replacement for the GSO draft posted on August 20, 2013. The AESO requests the stakeholders to confirm the revised GSO draft by September 17, 2013 (10 business days).

The AESO appreciates the timely feedback from the stakeholders which helped to improve the accuracy of 2014 GSO.

Yours truly,
