

July 20, 2005

Dear Stakeholders:

Re: H Values for the Calculation of Capacity Values and Loss Factors, 2006

As discussed on July 5, the AESO committed to providing H2 and H3 values to assist in the calculation of capacity for the purposes of loss factors.

The values are:

	Winter	Spring	Summer	Autumn
H2	75	50	150	50
H3	2025	1400	2100	1400
