

**June 18, 2007**

**Meeting #2  
Loss Factor Stakeholder Meeting, June 18, 2007, 09:00 a.m. - 11:30 a.m.  
AESO Offices, 25<sup>th</sup> Floor Board Room**

The second stakeholder meeting regarding the 2007 Transmission Regulation and transmission losses was held on June 18 2007.

The comment matrix was filled out with input from the first meeting, but no stakeholder's comments were added. The 2007 loss factors were recalculated based on the AESO's preliminary understanding of the Regulation. These loss factors will be shared later this week as some refinements are added and clarification is provided. The calculations are still draft and subject to enhancements such as the inter-tie modeling.

The AESO is requesting the following:

- Stakeholder provide their input via the Matrix, to be re-posted on the web site this week. The document will be editable and will be in "tracking" mode, so changes are easily identified,
- Stakeholders provide input by June 27, 2007. The AESO will provide the comments back to stakeholders prior to a mid-July meeting. The date will be shared shortly.

Please provide any input via [lossfactors@aeso.ca](mailto:lossfactors@aeso.ca) or contact me at 403 539 2614. The regular meeting notes and actions have not been updated at this time.

Regards,  
Robert Baker, P.Eng.
